#### HOW RINGLER RUSTICS GETS AND PROCESSES THE BARN WOOD

The wood for all these items is made with reclaimed antique barn wood. Early settlers hand hewed many beams and rafters for their out building structures. Later structures were made of rough sawn wood cut in local mills. This wood is all kiln dried to ensure proper moisture content, and also to eliminate any powder post beetles or other insect life. This guarantees you receive a product that will resist warping or future cracking, and is also insect free.
